INTRODUCTION

For many years the following E-book was only available in German.

Although there has been great demand for such a kind of work, I was still a little reluctant to having it translated.

I could not put my finger on it, but I somehow felt that the lack of personal contact over such a great distance would make the matter too difficult.

In Germany, where I live, people could just call me on the phone, or even come by and ask me personally, if there were any unclaritys, but when you go international, such things are no longer possible.

However, I have looked at the matter again and modified it in such a way that personal questions should no longer be necessary.

I am certain that you will be able to work with all the additional information given in this book, and extend your statements and analyses considerably.

The following work will

- ✚ Give you many more possible combinations and meanings
- ✚ Show you how to analyze a spread from beginning to end
- ✚ And, finally, show you how to talk to your clients in a positive and encouraging way.

I have tried hard not to “swamp” you with a lot of unnecessary information and keep my explanations as simple as possible. However, I am convinced that once you have mastered my other books and moved all the way on to this volume, you are no longer a beginner at cartomancy and will be able to follow my examples without difficulties.

And by now you should also know that there is only one thing, which makes you perfect: Practice! [.....]

The following chapter will show once again how many different meanings you can get out of a single Time- or Future Card.
So please make sure you study them well and interpret them carefully step by step.

Please note:

Time- and Future Cards may set relatively tight time frames and cartomancers can therefore easily get themselves into hot water!
It is therefore important to take your time, take the whole story into consideration and never ever jump to conclusions!

The following examples shall show you how many different meanings and interpretations a single Time Card may encompass:

Example: No. 31 Sun

basic interpretation:

The original, primary meaning of this card is as follows:

No 31 Sun *South,
Success*

Advanced interpretation:

As a Time Card the same card has got the following meanings:

No 31 Sun *summer, day*

As you can see, we have already got 4 possible interpretations.

If we interpret those cards now in the context (e.g. No 28 or any other card), it becomes clear that both the entire spread, and the personality of the customers and their present/immediate situation must also be included

before we can commit ourselves to a certain interpretation.

Should you still feel a little uncertain about working with the Time Cards, perhaps then it might be a good idea to leave this aspect aside and work completely without temporal statements until you feel secure about them.

Practice by and for yourself alone and try your new skills on other people's spreads only when you can work with this technique standing on your head, and feel totally at home with the new way of interpreting your cards.

Up to then I recommend interpreting the respective card completely in its original primary meaning (e.g. NO 31 Sun - success, South).

As you know, you can work both with and without temporal statements.

THE FOUR POINTS OF THE COMPASS

Just like the seasons or the professions, you can also find the four *points of the compass* in your cards.

As the type of analysis is the same as in the preceding exercises, we will limit the following exercises to two out of the four *points of the compass*.

No 31 Sun

Southern/South

No 32 Moon

Northern/North

No 3 Ship

Western/West

No 22 Paths

Eastern/East

Let us now move on to the exercises:

Please use the basic interpretation of the cards first, before you continue with the *direction* in a second step.

Whether you would like to use the more advanced interpretation as well, is up to you!

Diagonal axes of interpretation

Under normal circumstances I would look at the main Personality Card (Woman) first, but in this special case I am curious:

Should she really split up with her current partner, will she stay where she is, or will she move out?

.....

Fortunately, the answers to these questions are not blowing in the wind, but clearly visible in our spread:

The first question can be answered on the spot:
Yes, she will move out.
The House Card is not positioned in her partner's axis, so the one leaving the current home will be her.

She has no need to worry, though, as the following cards show:
